# The Most Powerful Air Cleaning Systems

**\* Five Seasons**  
INDOOR AIR QUALITY EXPERTS®

# Clean Air Means Healthier Air

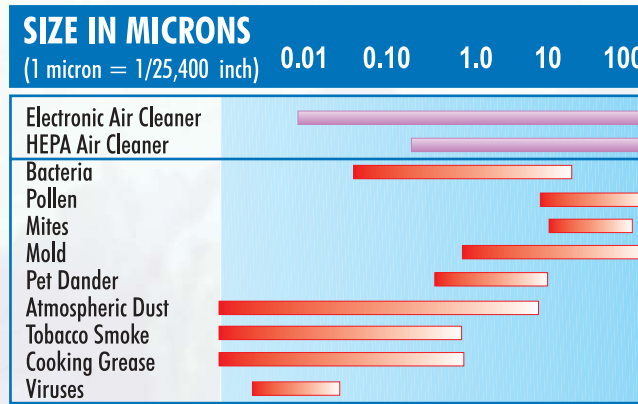

## Concerned about the air you breathe?

- Considering that you spend about 90% of your time indoors, breathing in 18,000 liters of air each day, which may be 20-70 times more polluted than outdoor air ..... you should be concerned!
- Some of these airborne contaminants are uninvited like pollen, mold, fungi, bacteria, viruses, dust and mites. While others are self-contributed like tobacco, wood or cooking smoke, pet dander, insecticides, toxins emitted from personal care products or household cleaners.
- These contaminants adversely affect indoor air quality, which in turn affect your health and comfort. Whether the effects are mild or severe, short or long ranging, they can cause symptoms like itchy, watery eyes, sore throat, sneezing, runny nose, headache, fatigue, tightness of chest, shortness of breath and even epidemics of colds or flu.
- Even if you're not immediately affected, the smallest pollutants are inhaled and retained deep in the lungs, which may result in respiratory and other health problems after years of repeated exposure.

## How can Five Seasons Electronic Air Cleaners help?

- Will remove airborne contaminants as small as 0.01 micron (1 / 2,540,000 of an inch).
- Activated Carbon Filters will help remove tobacco, cooking and mildew odors.
- Activated Carbon/Potassium Permanganate VOC (Volatile Organic Compound) Filters will remove odors/ fumes emitted from carpets, cabinets, glues, household cleaners, paints, varnishes, solvents, personal care products, tobacco and cooking smoke, and more (included with models 585AI-2-W, 985AIV).
- Negative Ions revitalize the air, just like air after a rainfall, near a waterfall or near a spring. Studies show that negative ions beneficially affect human biochemistry, both physically and mentally.

## Pollutant Comparison Chart

## How will you benefit?

- **Removes irritating airborne allergens. A must for allergy, asthma and respiratory sufferers.**
- **Helps clean up a smokey environment quickly.**
- **Helps reduce or eliminate noticeable pet and cooking odors.**
- **Helps reduce housekeeping time and redecorating costs, by removing the black and greasy staining particles.**
- **Improves indoor air quality for a healthier environment.**

## Why are Five Seasons Electronic Air Cleaners better?

- A Lifetime Electronic Filter never needs replacing - simply washes clean.
  - \* *Environmentally-friendly.*
  - \* *Savings over first 2 years could pay for unit, compared to disposable filter Air Cleaners.*
- Electronic Filter holds dirt particles like a magnet, which won't dislodge until washed away.
- Electronic Filter has more effective filtration area than most disposable filters or other electronic air cleaners on the market.
- User-friendly. Superior 4-stage filtration system and cabinet, are easy to maintain and durably designed for years of steady use.
- Unique air intake / exhaust design creates circular air flow patterns that never short cycle or blow directly on room occupants.

## When to choose a Five Seasons HEPA Air Cleaner

- HEPA versus Electronic Air Cleaners - It's a matter of choice - whether to replace filters or simply wash them.
- HEPA filter will remove 99.97% of particles 0.3 micron and larger (1 / 84,000 of an inch).
- Five Seasons HEPA Air Cleaners are easier to use and maintain, than other HEPA units on the market.
- Unique air flow design, allows unit to be placed against a wall. Top of unit can also be used as a table.

## Cleaning your Whole Home

- In addition to portable air cleaners, Five Seasons offers a complete line of duct mount Electronic, Media and HEPA Air Cleaners to clean your whole home.
